

## History & Mission

Real Estate Equities was formed in 1972 with a vision of providing quality rental and ownership properties that improve communities. Co-founded by Robert S. Bisanz and Terrence E. Troy in their hometown of Saint Paul, Minnesota, the company has consistently delivered the finest real estate development, property management and investment services.

### 30 Years of Excellence:

Our co-founders' commitment to excellence has created a strong and prosperous enterprise. They have been the developers and managing partners in more than 70 projects that account for nearly 7,800 units. Their reputation for quality continues to grow with each project they undertake.

In more than 30 years of operation, Real Estate Equities has continued building on its successes. As our staff has grown in size and experience, so has our expertise in all facets of project development, property management, and asset management.

### A Bright Future:

Today, our growing portfolio includes affordable and market rate apartments, townhomes and senior cooperatives. Our reach extends throughout the greater Twin Cities metro area and is expanding to neighboring states. Keeping its co-founders' vision in mind, Real Estate Equities is building an even brighter future.
